

#### ***“Protecting Your Mobile Devices From Cyber Crime”***

This lecture explains the problem of cybercrime and discusses methods to protect computers and mobile devices from attack. Topics discussed also include password safety, recognizing scam emails, and what steps to take if victimized by cybercrime.

**Friday, September 15, 2017 9:15am-12:00pm**

**Tony M. Lambert, Systems Administrator  
Volunteer State Community College**

#### ***“Reforming Antebellum America”***

Antebellum America was a society in transition, leaving the old agrarian world and entering a new urban and industrial one. This change caused profound discomfort and great attempts at reform. This topic will look at the social revolutions of this period and how those influenced religion, slavery, gender, and more.

**Friday, September 22, 2017 9:15am-12:00pm**

**Grady Eades, Associate Professor of History  
Volunteer State Community College**

#### ***“Sumner County in the Great War”***

This lecture will explore the conditions in 1916 prior to the United States entry in the war. The effects of the war on the home front, “over there” and the legacy of the “war to end all wars” will be discussed.

**Friday, September 29, 2017 9:15am-12:00pm**

**Judith Morgan, Author**

#### ***“Do You Know Your Personality Profile? Are you a Bugs Bunny or a Road Runner?”***

Discover how the Myers-Briggs Typology Index personality profile can increase your knowledge about yourself and others to effectively lead and participate in teams at work, volunteer groups, or in any circumstance where you have to work with others. In this class, you will learn your MBTI profile and discover how to communicate with different and similar personality types.

**Friday, October 6, 2017 9:15am-12:00pm**

**Paige Holmes, Project Director LEAP 2.0  
Volunteer State Community College**

#### ***“Science and Sustainability”***

It is essential we continue to investigate the impact humans have on the environment, in the wake of a rapidly changing world. The generation of waste, global climate change, the loss of Earth’s biodiversity, and Earth’s energy sources (and alternatives) – these are just some of the major topics that will be discussed during this presentation. The conservation of resources and the development of long-term solutions give us the potential to sustain life here on earth for future generations. The aim of this session is to present attendees with enough knowledge that they can (and will!) continue to investigate the topics discussed and to encourage attendees to become involved at the local level with regards to some of these environmental problems.

**Friday, October 13, 2017 9:15am-12:00pm**

**Erin Bloom, Instructor of Biology  
Volunteer State Community College**

#### ***“Backyard Fruit Production”***

For their own enjoyment and personal satisfaction, more and more homeowners are interested in growing fruit in their backyards. This session will provide basic information regarding the production of small fruits and tree fruits. Site selection and preparation, planting, insect and disease control challenges, pruning, and the harvesting of the fruit will be included in the presentation. Production guidelines for blackberries, blueberries, strawberries, grapes, peaches, and apples will be offered during the session.

**Friday, October 20, 2017 9:15am-12:00pm**

**Bob Ary, University of Tennessee Extension Agent  
& County Director, Sumner County**

***Join us this Fall  
for an  
Exciting and Informative  
Lifelong Learning  
Lecture Series!***
